Agreement for master project

Important notice for the heads of EPFL laboratories:
This agreement shall not be signed:
1) when the master project is part of a research project in the laboratory financed by the company. In such a case, a research agreement shall be negotiated and executed in collaboration with the company and the Technology Transfer Office of EPFL (TTO) and the Student will sign with EPFL an agreement on intellectual property and confidentiality.
2) when the laboratory discloses to the Student source code or EPFL confidential information. In such a case, the ownership on and the right to use EPFL intangible assets and the results of the Student shall be well analysed and discussed. Do not hesitate to contact TTO.
In addition, this agreement may only be signed if it is fully compatible with the other projects within the laboratory.
For clarity, this agreement does not authorize the transmittal of EPFL confidential information.

This agreement is entered into by the three following Parties:

The host company
National Observatory of Athens
Represented by
Dr. Evangelos Gerasopoulos
(hereinafter referred to as "Company")

AND
EPFL, the Swiss Federal Institute of Technology in Lausanne
Bâtiment CE – 3.316, 1015 Lausanne, Switzerland
Represented by Professor EPFL
Athanasios Nenes
Head of the laboratory:
Laboratory of atmospheric processes and their impacts
Ecole Polytechnique Fédérale de Lausanne, CH-1015 Lausanne Switzerland
(hereinafter referred to as "EPFL")

AND
Léo Pillac-Mage
31 route de vignières, 7400 Annecy, France

enrolled for the program MS Environmental science and engineering . Year 2026.
(hereinafter referred to as "Student")

Art. 1 Sphere of application

This agreement determines the relations between the Parties for a master project and establishes the rights and obligations of the Company, EPFL and the Student during the master project. The master project will be carried out by the Student within Company's premises as well as within the premises of the above-mentioned laboratory, upon mutual agreement between the Parties.

Art. 2 Content of master project

Master project title: Enhancing Urban Air Quality Modeling: A Numerical Pipeline for Emission Downscaling and Policy Impact Assessment.

The program of the master project is determined jointly by the professor EPFL and the Company. It shall correspond to the program of the Student. The subject is described in the annex to this agreement.

Art. 3 Terms and conditions of the master project

The Student remains a student of EPFL until the end of the master project.
The master project is done from 09/03/2026 to 01/08/2026.
The presence (dates, timetable) of the Student within the Company shall be agreed upon between the Company and the Student.
Department/Unit and location of the master project within the Company: Institute for Environmental Research and Sustainable Development, I. Métaxas et Vas. Pavlou, P.C.15236 Palaia Penteli.

Art. 4 Host facilities and supervision

The master project is conducted under the direction of the EPFL professor (hereinafter referred to as "EPFL Academic Supervisor")
Athanasios Nenes
athanasios.nenes@epfl.ch
+41 21 693 80 31
The EPFL Academic Supervisor supervises the work of the Student.
During the master project, the Company undertakes to:

- ensure the supervision of the Student at the Company's premises;
- provide the Student with a suitable workstation and all the technical and scientific conditions and infrastructures necessary for the completion of the master project.

Art. 5 Remuneration and advantages

The Student and the Company may agree separately on remuneration from the Company.

One of the goal of the master project is to develop the vocational aptitude of the Student in addition to the theoretical and practical training followed at EPFL and thus facilitate his/her future integration into the professional world; the Student must therefore remain free to choose his/her future professional activities.

Art. 6 Insurance, civil liability

a) Health insurance

The Student is responsible for obtaining his/her own health insurance throughout the studies, including throughout his/her master project, whether this is carried out in Switzerland or abroad.

In case the master project is carried out abroad, the Student shall check that his/her insurance coverage also extends to the country in which the master will be done, failing which he/she shall take out additional insurance.

b) Professional and non-professional accident insurance

The Student shall check that he/she is covered for professional and non-professional accidents in Switzerland or abroad and if this is not the case, shall take out the necessary insurance before starting his/her master project.

In the event of an accident **or** illness occurring during the master project, the Student shall inform their EPFL Academic Supervisor without delay.

c) Third-party insurance

The Company shall take out insurance guaranteeing its civil liability for any damage caused to the Student. Should no such insurance exist, the Company shall bear the costs of any damage it has caused to the Student during the master project. The Company shall bear at minimum the same liability towards the Student as it bears towards its own employees.

The Student has a duty to take out individual third-party insurance covering any damage caused in the context of the master project. The Student must check that the insurance policy also covers the master project activity abroad if applicable.

Art. 7 Master projects abroad

The Student must announce any master project abroad to the EPFL Safety Domain (through this website) to benefit from the assistance programme.

The Student must complete the necessary administrative formalities (visa, work permit, vaccinations, etc.). Assistance is provided by the Company.

Art. 8 Discipline

During the master project, the Student is subject to the discipline and internal regulations of the Host Company, especially with regard to schedules and health and safety regulations in force.

The Student shall inform the EPFL Academic Supervisor immediately should any impediment prevent him/her from doing the master project under the best possible conditions.

The Student shall perform their master project with due diligence but neither EPFL nor the Student shall be liable in case of non- or improper execution of the master project.

Art. 9 Evaluation of the master project and right of review by the Company

At least two (2) weeks before the filing of the master project at the secretariat of his/her section, the Student shall submit to the Company its term paper of the master project in writing (email, etc.). The Company may request, within a maximum period of two (2) weeks from the submission by the Student that:

(i) parts of the master project containing Confidential Information (as defined in article 11) of the Company shall be kept confidential, and/or

(ii) parts of the term paper shall be kept confidential for up to three (3) months – extendable to up to six (6) months maximum upon written justifications sent by the Company to the Student and the EPFL Academic Supervisor – to allow the filing of a patent application.

The Company shall also inform at the same time, the EPFL Academic Supervisor of this request. If the Company does not respond within the above-mentioned period of two (2) weeks, no part of the master project will be kept confidential.

The Student then files his/her term paper of master project at the secretariat of his/her section as per the directive of EPFL pointing out, where applicable, the confidentiality restrictions in accordance with this Article 11.

This term paper gives rise to an oral defence in front of a jury consisting of at least the EPFL Academic Supervisor and an external expert. The supervisor of the Company may be appointed external expert.

Art. 10 EPFL resources

EPFL installations and resources are intended for internal use only and can only be used by the Student within the framework of his/her education. Should the Student need to use the installations, resources, information, software and/or other intangible assets of EPFL for his/her master project, he/she will request the permission of the EPFL Academic Supervisor; if this permission is granted, he/she will use the EPFL resources in question with the utmost care within the framework of his/her master project and shall not give access to the Company without written permission of EPFL. The eventual use of EPFL resources, including intangible assets, as part of the master project, does not confer any right to the Company on such resources and assets.

Art. 11 Confidentiality

Confidential Information shall mean information disclosed by the Company to the Student and to EPFL in the framework of the master project either in writing and clearly labelled as "confidential" or orally provided it has been declared as confidential at the time of disclosure and confirmed in writing by the Company to the Student and EPFL within ten (10) days after disclosure (hereinafter referred to as "Confidential Information"). The Student and EPFL shall keep Confidential Information in confidence and shall refrain from using it otherwise than for the purpose of the master project.

The confidential information of the Company that the Student receives when he/she is at the Company's premises does not need to be labelled as "confidential" neither to be confirmed in writing; the Student shall keep it in confidence, and in particular, shall not disclose it to EPFL.

The obligation of confidentiality shall be valid during five (5) years after the end of the master project and shall not apply to Confidential Information that

- was in the public domain or public knowledge at the time it was transmitted, or it later fell into the public domain or public knowledge for reasons other than an action or omission attributable to the Student or EPFL,
- was in possession of the Student or EPFL, without any limitation regarding its disclosure at the time it was transmitted to the Student or EPFL, provided that such prior possession is supported by written evidence,
- was obtained by the Student or EPFL in good faith and without any commitment relating to confidentiality from a third party entitled to disclose it,
- is or was independently developed by the Student or EPFL without violating any of their obligation under this agreement.

The Student undertakes not to keep, remove, or make copies of any document or software, of any nature whatsoever, belonging to the Company without the latter's written consent.

Art. 12 Intellectual property

The intellectual property rights pertaining to the results of the master project obtained by the Student are established directly between the Company and the Student. Should no such agreement exist, the following shall apply: the Student undertakes to transfer to the Company all his/her intellectual property rights regarding all inventions patented by the Company, and all his/her author rights on software developed as part of his/her master project. The Student agrees to provide the Company with all the documents and signatures necessary for the legal protection of the said inventions and software. This paragraph does not apply when EPFL and the Company have concluded a collaboration agreement in the framework of a project carried out by the laboratory of EPFL, and which includes the master project.

The Company shall mention the name of the Student as inventor, as per the applicable law, in any patent application when he/she is inventor or co-inventor. The Company shall apply to the Student its customary staff bonus policy for inventions, if any, and the applicable legal provisions.

Notwithstanding any agreement among the Company and the Student, and subject to Article 11, the Company, the Student and EPFL may freely use the results obtained by the Student in connection with the master project, which:

- do not consist in software; or
- for which a patent application has not been filed anywhere in the world within three (3) months – extendable to up to six (6) months maximum upon written justifications sent by the Company to the Student and the EPFL Academic Supervisor – after the Student has submitted his/her master project term paper to EPFL's secretariat pursuant to Article 9, or for which a patent application was filed and the granting of a patent was refused in all jurisdictions where the patent application and its counterparts were filed.

The signing of the present agreement does not confer any right to the Company concerning any intellectual property rights of EPFL (including patents, rights on software, copyrights, assets referred to under Article 10 and any results obtained by EPFL in connection with the master project). EPFL will

negotiate with the Company a licence on the results of EPFL stemming from the master project, if any, consisting either in an invention or software, provided EPFL is free to do so.

Art. 13 Interruption of the master project (termination of the Agreement)

Should any of the three Parties (the Company, EPFL or the Student) wish to terminate the master project, they shall immediately inform the other two Parties in writing. The justifications will be examined in consultation among the Parties. The final decision concerning termination of the master project (and therefore to termination of the agreement), be it by one or more Parties, will only be made at the conclusion of this consultation phase.

Art. 14 Applicable law, place of jurisdiction

If the seat of all Parties is located in Switzerland, this Agreement shall be governed by the laws of Switzerland, without regard to its conflict of law provisions. The exclusive place of jurisdiction shall be Lausanne, Switzerland.

If the seat of one or more Parties is located outside of Switzerland, this Agreement shall be governed by the laws of the defending Party's domicile, without regard to its conflict of law provisions. The exclusive place of jurisdiction shall be the competent courts at the defending Party's domicile.

***

The parties agree that execution of this agreement by exchanging PDF, or electronic signatures shall have the same legal force and effect as the exchange of original signatures.
